PERSONAL PROJECTS

February 2022 – Present

Web & Mobile Application

Doing All my past projects with these technologies :

.NET Core,   Angular,   Flutter.

SQL Server,   Firebase.

October 2019 – November 2019

Mobile Application Android

Platform almost similar to UBER.

- Developed with another developer on this project.
- Was in charge of the Android mobile part where I consumed the API developed by her.
- Designed and implemented the interfaces.
- **JAVA, Android Studio, Firebase.**

PROFESSIONAL EXPERIENCES

April 2021 – December 2021. Monastir, **TUNISIA.**

Web Developer End Of Studies Internship (M.S.) at DocstreamSolution

A platform that allows the company to manage each of the applications that it offers to its customers.

- Developed a microservice as an API gateway that will be used by all the other company's applications. It implements other features used by those applications such as the IP based access restriction, verification of the contract before a request, etc…
- Developed another web application that uses this microservice, to help the company to have a global view of all its applications with some statistic graphs. It implements other features such as the backup of all data for an application.
- Developed those applications with the MVC architecture and the Scrum methodology.
- Implement the unit test, integrated test and others tests for the app.
- **C#, .NET Core MVC/API, SQL Server, xUnit.**

August 2020 – September 2020. Monastir, **TUNISIA.**

Web Developer Summer Internship at DocstreamSolution

A module that allows the management of a company's workflow.

- Developed this module in microservice that will be integrated into an electronic document management (EDM) already created by the company.
- Developed with the MVC architecture.
- **C#, .NET Core MVC, SQL Server.**

August 2019 – September 2019. Monastir, **TUNISIA.**

Android Developer Summer Internship at Bongest

An application that allows an entity to manage its real estate assets.

- Worked in collaboration with another developer and I was in charge of the Mobile part.
- Designed all of the interfaces for the mobile version.
- **JAVA, Android Studio.**

February 2019 – June 2019. Monastir, **TUNISIA.**

Web/Mobile Developer End Of Studies Internship (B.S.) at Bongest

A management platform to manage a vehicle fleet.

- Was in charge of fully developing the platform, the design and the choice of architecture, under the supervision of a senior.
- Developed with the MVC architecture and a side web API to be used by the mobile app that I designed and developed.
- **PHP,** Full Stack **Laravel, NativeScript** (IOS/Android) **, MySQL.**
